CORE SERVICES

Elite Analytical Solutions is a consultancy comprised of subject matter and technology experts with a focus on Business Processes, Data Management and Analysis. From strategy to deployment of technical and data science resources, Elite Analytical specializes in transforming data and business requirements into Solutions that can optimize your business.

Analysis, Roadmap & Strategy

Our team builds practical and actionable strategies to establish the foundation and direction necessary to ensure success through- out BI, Data and Analytical initiatives.

Analytics & Optimization

Exploit patterns found in data to predict behavior, risks and business opportunities. Leverage Predictive Modeling, Forecasting, Optimization and Machine Learning/AI for competitive advantage.

Business Intelligence & Insights

Create a self-service reporting environment including visualizations and dashboards that use KPI's to provide actionable insights and make data-driven decisions.

Change Management

Ensure your BI and Analytical initiatives are successful by establishing process and communication tools that align with corporate direction and strategy.

Training

Empower your organization by developing a knowledge-driven culture, increasing adoption of technology, providing professional development and maximizing return on Analytics investments.

Data Governance

Put the controls in place to trust your data. Implement a cohesive strategy combining people, processes and technologies to improve the availability, usability, integrity and security of enterprise data.

Data Modeling & Development

Ensure your data strategies are aligned with organizational objectives and security by leveraging skilled data architecture and development expertise.

Technical Architecture

Improve the quality and performance of your Analytics platform by fully understanding your business processes and optimal deployment of technology infrastructure to industry best practices for analytics.

On-going Support

Capitalize on our team's technical and subject matter expertise to support your BI/Analytics platforms. Reduce support costs and free up your resources for other important initiatives.
