

TRAINING CLASSES

Develop a knowledge-driven culture, increase adoption of technology, provide professional development and maximize return on Analytics investments.

Elite Analytical Solutions® offers a range of training options to help your team level up skills and contributions using proven business analytics tools. Elite will provide you with an experienced instructor for live training delivered on-site or remotely.

Our standard course structure consists of an instructor delivering prepared course materials, answering your questions, and guiding you through hands-on practice exercises.

Customizable courses are also available as workshops or Lunch & Learns so you can apply what you've learned to your business immediately.

IN PERSON & ONLINE TRAINING

- Alteryx:** Beginner · Intermediate
 - Power BI:** Beginner · Intermediate · Advanced
 - Python:** Data Prep · Diagnostic · Predictive
 - R:** Beginner · Intermediate · Advanced

 - SAS:** Intro · Data Manipulation · Accelerated · Review · Advanced Topics and more...
 - SQL:** Beginner · Advanced
-
- Analytics Skills:** Data Literacy · Data Storytelling

ALTERYX

Learn the fundamentals of the Alteryx Designer interface and workflow settings. Through hands-on training, students will be able to connect to, prepare, blend, parse, pivot, analyze, shape, and transform data.

POWER BI®

Training for the analyst and end user with our Power BI Certified instructors. We personalize each training to your industry and use.

PYTHON™

Learn the basics of python and data preparation or more advanced users explore the analytical mindset & programming skills in the Data Science module. Includes Jupyter (IPython) Notebook, NumPy, Pandas, Matplotlib and Scikit-learn.

R

Our tailored training courses cater to beginners who can dive into the fundamentals of data manipulation, while more advanced learners can deepen their understanding of statistical modeling and data visualization.

TABLEAU®

Provide up-to-date Tableau training for the analyst and end user. Our Tableau Certified instructors can give you hands-on training, tailored to your industry and use ranging from Beginner to Data Storytelling.

SAS®

We provides a range of SAS Training: from enterprise programs for the entire organization, to custom training classes that meet specific departmental/user requirements.

SQL

Our SQL programs offer our specialized training courses, aimed at beginners, intermediate and advanced users, to provide instruction for well-rounded expertise.

ANALYTICS SKILLS

Our Analytics Skills courses teach participants how to effectively navigate data to ask the right questions and define the right metrics, with a focus on context, design, communication, and automation.
